

SECUMETER

WE USE
ULTRASOUND
TO ALERT WHEN
2 M DISTANCE
IS NOT RESPECTED

STOP
COVID

Help Workers to respect Physical Distancing

During a day work, it's not easy to always be aware of physical distancing.

To complement the security measures taken against the spread of COVID-19, STIMSHOP SECUMETER badge flashes and vibrates when two workers are less than 2 meters distance.

They feel secure under any circumstances.

With this personal alert system, Management trains its staff to respect safe distances and provides them with a simple tool to be aware of the security instructions at all times.

SECUMETER

□ Description

- Ultrasonic speaker and microphone
- Exclusive technology to calculate distance between 2 badges
- Flashing led and vibrating system
- Rechargeable badge, estimated 12h autonomy
- Estimated dimension: 64x44x20mm
- Estimated weight: 200g

□ Functions

- Flashes when badges are less than 2 meters distant
- Works with multi badges interactions
- Specific algorithm to avoid false positives alerts
